

## **Report on webinar conducted by MIC Driven Activity of Quarter 3 & 4.**

**Theme: “Why IP is important in academia?”**

**Speaker:** *Dr. Abhay Jere*, Chief Innovation Officer, MoE’s Innovation Cell.

*Dr. Mohit Gambhir*, Innovation Director, MoE’s Innovation Cell.

**Mode of Activity:** Online via YouTube

Under the title of “Why IP is important in academia” One day webinar was organized by MHRD Innovation cell of India, on 26<sup>th</sup> April 2021. The webinar was attended by all the faculty members of F.E.T. and research scholars had actively participated in the webinar. Dr. Abhay Jere, Chief Innovation Officer, MoE’s Innovation Cell and Dr. Mohit Gambhir, Innovation Director, MoE’s Innovation Cell were present as resource persons (speakers).

**Following are the key points which are discussed by the speakers:**

1. Knowledge of IPR must be given to student at early stage of study because if they are interested to do innovation along with patenting they need not to search very much on IPRs.
2. IP also enhance the standard of research of the nation. IP also open the door of commercialization and startups.
3. IPR is a solid instrument, to ensure the venture, time, cash, and exertion contributed by the innovator/maker of the IP.
4. Academic institution play important role in the development of society; therefore, institutions need to create such an environment where student learn to find existing problems in society or in day today life of human and try to come with some new ideas to solve them, which could be a baseline idea for any forthcoming startup activity.
5. IP play vital role in academics as universities and public research institutions are the factories of knowledge economy. IP also add another mechanism to generate economy.
6. An academic institution teaching activity will also generate IP such as: print application, thesis, software, film, sound recording, computer presentation, multimedia work. They are generally protected by copyrights.

## Research Management and Intellectual Property

For decades, universities and R&D institutions in the developing economies have not been associating themselves with IP.

- Neither promotion nor protection;
- IP - Not in teaching curriculum or slowly making ways;
- No or lack of Institutional IP policies;
- Researchers - interested with the immediate economic gains - at the expense of the long term value that can be captured from research outputs using the IP system.

## Role of IP in Academia

- Universities and public research institutions (PRIs) are the factories of the knowledge economy.
- Intellectual property (IP) adds another mechanism for universities to disseminate the knowledge that they generate and to have that knowledge used in the economic sector.

IP and Teaching

In addition, an academic institution's teaching activities will also generate IP, such as:

- print publications,
- theses,
- software,
- films,
- sound recordings,
- computer presentations and multimedia works.

These are generally protected by copyright. The internet and modern technologies have fostered greater access to scholarly materials, but also prompted greater conflicts over their ownership and use. So, Universities/institutions need suitable IP policies to deal with the ownership and management of teaching materials, access to scholarly information and use of third-party materials.

Country	2019 Patent Applications	% Change
China	1,400,661	+ 5.2%
U.S.	621,453	+ 4.1%
Japan	307,969	+ 1.8%
Republic of Korea	215,975	+ 4.3%
EPO*	181,479	+ 4.1%
Germany	67,434	+ 0.7%
India	53,627	+ 7.1%
Canada	36,488	+ 5.8%
Russian Federation	35,511	+ 6.4%
Australia	29,758	+ 0.7%

In 2019, China's IP office received 1.4 million patent applications. It was followed by the offices of the U.S., Japan, the Republic of Korea and the European Patent Office. The top 10 offices accounted for 92% of the world total in 2019.

Notes: \* EPO is the European Patent Office
