

Special Presentation – I & II

IBM - Innovation Center for Education (ICE) Program

Date: June 22 & 25, 2021

Theme:

IBM's offerings and partnership with academic institutes

Two special presentation (I & II) in response to National Webinar held on 12th June with Dr. Anil Sahasrabudhe, Chairman, AICTE (5th National Event by IBM) by IBM Innovation Center for Education (ICE) has been held on June 22 & 25, 2021 respectively in virtual mode by IBM and hosted by its industrial partner named Datagami Technology Services Pvt. Ltd, Mumbai - 400 069(9702934397) from 11.30 am to 1.00 pm (IST) both days. This presentation was organized to introduce IBM - ICE Program (Unique Global Initiative by IBM) to handful of educational institutes for making students of these selected institute industry ready by providing thorough understanding & training of industry-required skills from IBM experts. FET-GKV, Haridwar is one of those privileged academic institute in the country, which has been chosen by IBM-ICE Team for the Industry-Academia Collaboration. Dr. Mayank Aggarwal (HOD -CSE Dept) along with Dr. Suyash Bhardwaj, Dr. Nishant Kumar, Mr. Deepak Painuli & Mr. Sumit Bansal (Assistant Professor, FET-GKV), have attended the program as representative from FET-GKV Haridwar.

This online presentation was hosted by Mr. Sanjiv Mehta, Advisor & Head Program Development, IBM Innovation Centre for Education (ICE), on following points given below: -

- ❖ IBM Collaboration with Education Institutes.
- ❖ IBM's Centre of Excellence at Education Institutes.
- ❖ IBM's Emerging Technology & Industry Domain Courses for Education Institutes.
- ❖ IBM's Schedule of Signing & Commencing Collaborations with New Education Institutes for the Academic Year 2021-22.

Initially Mr. Sanjiv Mehta discussed need of digital literacy for every human being using past survey stats of internet uses in in the world and showcased the increment in introduction of New Roles against the collapse of Old Roles with the estimated 02:01 ratio in the job market, whether roles are related to IT or some other industry. He also explained about reasons of academic institutes to be failed in regards to generate industry ready students by discussing challenges educational institutes have to face due to innumerable constraints and also asked to institute to shake hand with Subject domain Experts from Industries, considering the fact that skills provided by academic institute to their students during their courses are not at par industry specification required by specific industry, this explanation landed to "Industry-Academia Collaboration" between academic institutes & IBM – ICE.

Under this Industry-Academia Collaboration by IBM-ICE, Mr. Sanjiv Mehta briefed about how this collaboration works to develop students of associated institutes to be industry expert by giving them an appropriate skill development environment by providing subject domain experts (either from IBM itself or host institute's professor trained by IBM), fully equipped lab and study resources online & offline both via experts recognised by IBM-ICE Team. Mr. Sanjiv Mehta also added how this collaboration will help students, teacher and associated academic institute to grow in current market scenario and be future ready all the time. By presenting the example of Digital Developer Conference by IBM, he emphasised on importance of this collaboration having past average recruitment success rate almost 95%.

In the final worlds of this presentation, along with above said, Mr. Sanjiv Mehta also discussed about different – different IBM-ICE offerings on the basis of course duration, min criteria for these offerings no of specialisation opted by institute & no of student registered, schedule of signing & commencing Collaborations for the academic year 2021 - 2022 and benefits of this partnership to the host institute.

Ground Reality Faced by Education Institutes

Almost all Education Institutes have started offering courses on fundamentals of IT and Emerging Technologies.
 All Education Institutes ALSO do their very best to teach the fundamentals of IT and Emerging Technologies!!!

Yet graduating students do not possess the required applied skills on fundamentals of IT and Emerging Technologies, skills required by the Industry.

Issue	Percentage
Employability of students (when they graduate)	79.7%
Absence of fresh curriculum that is benchmarked with global standards	78.3%
Lack of global perspective	63.8%
Lack of quality jobs	43.5%
Increasing fees	34.8%
Others	27.5%
Lack of global perspective	10.1%

Ground Reality Faced by Education Institutes IBM

Teaching Applied knowledge on Emerging Technologies & Industry Domains requires:

- *Hiring Practitioners as teachers.*
 - Hiring Industry Experts & Practitioners as teachers is next to impossible not only due to existing norms but also due to expectations of Industry Experts & Practitioners.
- *Conducting in-depth and numerous hands-on lab exercises, as per industry standards.*
 - Time duration and expertise required to conduct & evaluate in-depth and numerous hands-on lab exercises, for each student and that too as per industry standards, is numerically and humanly impossible.
- *Resolving case studies as per industry specifications.*
 - No access to & knowledge of industry specifications as well as the availability of 'best in class exercises & case studies'.

CHALLENGE

Educational Institutes face innumerable constraints of making students 'industry-ready' on applied fundamentals of IT and programming skills.

- Hiring Industry Experts & Practitioners as teachers is next to impossible not only due to existing norms but also due to expectations of Industry Experts & Practitioners.
- Time duration and expertise required to conduct & evaluate in-depth and numerous hands-on lab exercises, for each student and that too as per industry standards, is numerically impossible.
- No access to & knowledge of industry specifications as well as the availability of 'best in class exercises & case studies'.
- Existing norms literally forbid daily/weekly - knowledge/skill checks/tests, for 'evidence-based learning'.
- Time, skills, technology & resources just do not exist for proctored & plagiarism checked coding assessment with fine grained Rubrics, that covers concept/function level grading, code quality and efficiency.

IBM Innovation Centre for Education

DIGITAL LEARNING PROGRAM

THE BIG DIFFERENCE

- Online discussion forums on a smart online platform to facilitate **peer-to-peer learning**.
- Regular interactive virtual sessions and ticket-based guidance from **IBM Subject Matter Experts** cements the applied learning.
- Frequent online coding contests are conducted for **students to benchmark themselves**, and with peers across the country.
- Intuitive visual dashboards, at the student, department and college levels, that provide **key insights for all stakeholders**, including recruiters.
- The **proctored certification exam** conducted in a supervised environment tests the knowledge and key concepts, and also critical problem-solving capabilities/coding skills with fine grained Rubrics, that cover concept/function level grading, code quality and efficiency.
- Upon successful completion of these Digital Learning Programs the students are fully equipped with '**Industry Ready Programming Skills**' and also get the much-coveted IBM Innovation Centre for Education Digital Badge.

OPTIONS For Education Institutes

- Collaborate with a global leader, in technology & training, who has proven expertise in applied IT fundamentals, programming skills and business domains.
- A partner who has 'deep rooted and reputed' connect with academia.
- A partner who is totally reliable and trustworthy.
- And above all can offer 'globally accepted' yet affordable programs in collaboration with educational institutes.

5 amazing facts

IBM

Few examples of IBM Inventions....

- PCs
- Lasic Surgery
- RAM
- Online Shopping
- Hard Drives
- Electron Key Punch
- Scanning Tunneling Microscope
- Relational Database
- Airline Reservation System
- Virtual Machine
- Space Flights (Moon Landing)
- Bar Codes & Magnetic Strips
- New Gen Video Games Console
- IBM Watson
- ATMs
- Smallest Computer
- Biggest Computer
- Quantum Computing....

- One of the most respected brands in the world
- Operations in more than 170 countries
- 6 Noble laureates from IBM & 6 Turing awards won till date
- IBM inventors received a record 9,262 patents in 2019, marking the company's 27th consecutive year of U.S. patent leadership. Number of patents crossing the 140,000-patent milestone.
- Nearly half of the patents granted to IBM are pioneering advancements in:-
 - AI
 - Cloud computing
 - Cyber security
 - Blockchain and quantum computing

About IBM - 76 years of history with Academia

Experience & Ability to Provide Industry aligned Skilling to Academia

GLOBAL UNIVERSITY PROGRAMS

Year	Program/Initiative
1944	Mark 1 Computer Science Academic discipline jointly created with Harvard University
1945	IBM Research Born in Columbia University
1950	PHD Fellowship program launched
1951	Faculty Awards (FA) program launched
1960	Computer Science Academic discipline supported by IBM and later adopted worldwide
1983	Service Science Management & Engineering (SSME) Academic discipline pioneered by IBM reaching more than 500 universities worldwide
1985	Shared University Research (SUR) Program Launched
1990	Center for Advanced Studies 1 st CAS launched in Toronto. Currently reaching to more than 26 centers worldwide
2003	IBM Academic Qualifications Supporting entry level certifications for students
2004	Academic Initiative The world largest pool of resources for academia. Currently reaching to more than 10,000 universities globally
2005	IBM Cloud Academy Global academic community
2006	Open Collaborative Research (OCR) Advanced Research Collaboration
2007	University Ambassador Global community
2008	IBM ICE Program Launch in India/SA (Graduation Program)
2009	Academic Skill Cloud Pilot with 20 institutions in USA
2010	Innovation Awards Curriculum for Smarter Planet
2011	IBM-on-Campus Pilot with 12 universities
2013	Launch of ICE SCOE & ICAT; Launch in ASEAN
2017	IBM ICE Growth 25+ Universities 16 Programs 6500+ Students Stepping into Geographies

About IBM Innovation Centre for Education

Innovation Centre for Education

To prepare the Next Generation of Young Professionals who would Lead the building of a Smarter Planet, by Enabling cutting edge IT and Industry domain Skills directly through their University Curriculum, thus preparing them for technology leadership roles

- Established in 2011
- World class emerging technology programs offered for Students (17 Specializations) in collaboration with Higher Education Institutes.
- Thousands of pages 'applied content' curated exclusively for the program.
- Deep engagement with Institute, Faculty, Students & Industry.
- 30+ satisfied Academic Institute as customers in India (during last 10 years).
- 95% Placement Records of IBM ICE Graduates
- Irreputable & Unparalleled IBM brand & legacy in academia/ IT Education.

THE BIG DIFFERENCE ABOUT IBM PROGRAMS

- Designed strictly in accordance with IBM's exacting global standards of excellence in skilling using unified learning approaches.
- Bloom's Taxonomy principles applied to build critical thinking capabilities.
- Highly practice oriented, taught & assessed by leading Industry Experts.
- Comprehensive learning paths, specially curated by IBM, and aligned to specific, in-demand, job roles of the IT industry
- Exposure to industry best practices to think logically from different perspectives to solve problems.
- Is powered by a best-in-class platform
- Projects, & instant diagnostic feedback like a personal trainer.
- Regular virtual sessions and ticket-based guidance from IBM Subject Matter Experts cements the applied learning.
- Annual contests are conducted for students to benchmark themselves, and with peers across the country.

Skills for 21st Century – Curriculum with “T” shaped skills

IBM

- Industry Aligned Curriculum /Courseware specially developed for Academia-Students including Lab material
- Curricula Designed to Build T-shaped individuals with indepth skills in CAMSS (Cloud, Analytics, Mobility, Social & Security) & Open Source Technologies & across Industries (BFSI, Telecom, Healthcare, Retail, O&G etc)
- Focus is on developing capability to build “IT SOLUTIONS” (Skills -Technology + Industry Domain Processes + Business Aspects)

Emerging Technologies / Industry Domain

B. Tech with specialization in:

- Cloud Computing & Virtualization
- Data Science / Business Analytics
- Cyber Security & Forensics
- Internet of Things (IoT)
- Artificial Intelligence & Machine Learning
- Graphics & Gaming Technology
- Mobile Computing
- Open Source Software & Open Standards
- Mainframe Technology
- IT Infrastructure Management
- Blockchain
- Banking, Financial Services & Insurance Informatics
- Retail Informatics & eCommerce
- Oil & Gas Informatics
- Telecom Informatics
- Manufacturing Informatics
- Healthcare Informatics

MBA with specialization in:

- Business Analytics

ICE Program Offerings with Target Academic Institutions

IBM

UG/PG Integrated Program (4 yr-Graduate)

Credited Courses integrated into University's Curriculum
Specialized Technology/Domain Curriculums & Courses for the 16 critical practices (500+ Hrs Teach time).
4 year engagement with 8 courses for each track
Suitable for Universities or Autonomous Colleges (Flexibility to Change Curriculum)

System Center of Excellence certificate stream (3 yr-Diploma+ Certificate)

Courses integrated/Add-on into University's Curriculum
Specialized Technology/Domain Curriculums & Courses for the 16 critical practices (250+ Hrs Teach time).
3 year engagement with 6 courses for each track
Suitable for Engg Colleges / Tech./Business Schools (Flexibility to change Curriculum)

System Center of Excellence certificate stream (2 yr-Diploma)

Courses integrated/Add-on into University's Curriculum
Specialized Technology/Domain Curriculums & Courses for the 16 critical practices (120+ Hrs Teach time).
2year engagement with 4 courses for each track
Suitable for Engg Colleges / Tech./Business Schools (Flexibility to change Curriculum)

1 yr-IBM Certificate for Advanced technology (ICAT)

Courses integrated/Add-on into University's Curriculum
Specialized Technology/Domain Curriculums & Courses for the 16 critical practices (120+ Hrs Teach time).
1 year engagement with 3 courses for each track
Suitable for Engg Colleges / Tech./Business Schools (Flexibility to change Curriculum)

Labs, Projects, SME campus sessions, Courseware access and student interactions and events with industry
