Speaking: Mani Madhukar

Module 3 - Watson Studio Data Refinery Visualizations / 1. Case Study

### Episode I - Discovering Fraudulent Claims with Data Transformation

#### Auto Insurance Company

**5,000 employees**  
**650 million in operating revenue last year.**

**Policy Cost Factors**  
Type of car insured - particularly the safety record and how expensive it is to repair.  
Driver's record - average spending tickets and age (teenagers cost more to insure because they're less experienced drivers, and therefore a higher risk.)  
Lower-cost premiums are assigned by drivers with fewer accidents and tickets on their records, part-time drivers, people who take driver education courses, and families with multiple cars.

Providing insurance policies to individual car owners across the continental United States.  
Drivers identify with a six-month policy with an auto insurance policy. Each month, or all at once, the driver pays a fee, or premium, to the company.

Activities 1/2  
1 Meet the Company  
2 Meet the Team
