In **Faculty of Management Studies (FMS, GKV)**, we nurture the overall personality of future intelligentsia and make them good human beings. I am glad to offer the various courses in management to different sections of society with a mission to make this world more peaceful and meaningful place to live.

Over the last couple of years, FMS has differentiated itself as a leading B-school through continuous improvement in its business teaching pedagogies and sincere efforts to groom students. The role of a good educational institution is to bring out the latent abilities of students so as to ensure their overall development. FMS has always believed in the new concept of all work and play without learning makes jack a dull boy, so we lay emphasis on learning propelled teaching instead of traditional teaching pedagogy. Believing that the young minds of today will become the policy makers of tomorrow, FMS tries to provide its young intellectuals, the opportunities to explore new tools and techniques to hone their skills. Today, in the intellectual, technical and competitive era, it is essential to be intuitive, creative and communicative to survive. FMS provides platform to the young minds by conducting conferences, symposiums, business quizzes, poster making and many other outreach programs regularly so that they can pioneer out of box thinking and tackle future challenges intelligently and calmly.

It is our alumni that makes us an intrinsically interfaced industry-academic body. Wherever they go, whatever they achieve, one thing remains unchanged and that is the relationship with FMS, faculties and students that give FMSians the linkage with the industry for better placement record every year.

Our Legacy...

Faculty of Management Studies [FMS] established in the year 1996, is running two post-graduate courses: (i) Master of Business Administration (ii) Master of Business Administration (Business Economics) and One BBA as under Graduate Course and two certificates courses in Sales Management and The Art of Happiness. The mode of selection of PG courses are through CAT, MAT, CMAT, GMAT entrance exams. Besides this, Ph.D. program is also running in different areas of management. The Faculty aims at providing quality conscious managerial manpower for the industries and for that purpose FMS aims at developing competent professional managers for ensuring competitive business environment and to infuse entrepreneurial and innovative styles in the future managers.

Besides this, there are multifaceted objectives to research, consultancy and managerial excellence. Marching ahead to the path of success, faculty is providing Wi-Fi environment and video conferencing facility to the students and faculty members. FMS, Gurukula Kangri (Deemed to be University) Haridwar is among the best teaching, research and consulting institutions. The Faculty has established itself as a world-class teaching and research institution and is involved in consulting and training programmes for the industry.

The alumni of the faculty hold, Inter alia, top management positions in the best of Indian as well as multinational companies. Besides the professional achievements, FMS provides the ideal setting and background conducive to learning where a student is a treasured asset.

Online Webinar Series organised during Covid-19

Continued Learning during Pandemic at FMS

On 11 March 2020, WHO declared Covid-19 as a pandemic and reported all the countries to treat, detect and reduce the transmission for the save of people's lives. This forced the people across the world to remain in lockdown and maintain social distancing and India was not an exception. Universities across the nation remained closed temporarily and shifted to online mode.

Though online learning is not new but organizing, attending and accepting webinars, online workshops, conferences as substitute of traditional methods were new for our country and FMS was one of the leading institutes to pioneer it. At FMS, this pandemic was converted into an opportunity and a series of webinars were conducted across the year 2020-21 on various contemporary topics related to management.

More than 60 webinars and expert lectures were conducted for the students and research scholars during this period in which many distinguished academicians, industrialists, entrepreneurs were invited as key resource person from different fields and backgrounds from India & Abroad.

Students and Research Scholars Reflections

Gratitude is a Transformational virtue that can bring GOOD even out of BAD

Gratitude cannot be just sentimental; it needs a real impetus to be felt. Thus, facts and figures serve greatly in creating a constructive impetus to feel grateful. Let us some statistics/facts and try to relate with them.

- 1) If you woke up today with no pain, you are luckier than the millions who live with chronic disease and pain.
- 2) If you have never known the dangers of war, the loneliness of prison, then you are better off than over 500 million people in the world.
- 3) If you have enough food on your table then you are far fortunate than around 821 million people who do not have enough of the food they need to live an active and healthy life. One in every nine people goes to bed hungry each night.
- 4) If your basic needs are covered, you must know that almost half the world's population (3.4 billion people) are still struggling to meet basic needs. Thus, you are richer than 50% of the rest of the world.
- 5) If you have some savings, then you are among the top 10% prosperous people in the world.
- 6) If you can read this, then you are blessed. Globally the number of people of all ages visually impaired is estimated to be 285 million, of whom 39 million are blind.

When we expand our awareness by looking at the condition of millions of others, it will become easy to realize how blessed we are in comparison to them and, thus, we get a natural tendency to feel grateful

Seed Funding in India

Prarambh' means 'an auspicious beginning'. As a verb, it implies 'to start'. Prarambh is expected to bring together top policy makers, industry, academia, investors, startups and all stakeholders from across the globe. In addition to deliberating on good practices from best of the ecosystems across the world, the sessions of the Summit are designed to showcase the spread and depth of entrepreneurship based on innovation in India. The idea is to attract the attention of global capital for startups in India, mobilize domestic capital, provide opportunities for accessing international markets to our startups and evolve enabling policy provisions.

What Is Seed Funding?

Seed funding or seed stage funding is a very early investment which aims at helping a business grow and generating its own capital. Also referred to as seed money or seed capital, investors often get equity stake in exchange for the capital invested. The investors can themselves be the founders and use their savings as seed money for their new company also known as bootstrapping.

Why Seed Funding Matters?

It is a fact that starting a new business and lifting it up off the ground is a huge ask for most entrepreneurs and it only gets tougher with capital constraints. Seed funding helps get things started before the business earns any revenue. It is an effective solution for startups and growing businesses as it provides the much-needed early monetary support.

How To Raise Seed Funding?

There are a few steps founders need to follow in order to understand how to

get seed funding for a startup. For the best investment in terms of amount and investor relations, founders and entrepreneurs need to research the investor market and find an investor that is active for the sector in which the startup is working. Startups should also be ready with all the paperwork and bank details that will be needed for the transaction. One of the most important parts of impressing the potential investor is the presentation. It should be precise with all the necessary data that the investor would want to know. The presentation should include all projected data and justifications for those projections. If the numbers seem impressive and achievable to the investors, they will proceed to the negotiations. This way, startups can raise seed money in India and overseas.

Going ahead, the government will provide guarantees to help startups raise debt-capital. The government will launch a Rs 1,000-crore seed fund for startups, called Startup India Seed Fund, which will help startups with the initial capital for growth and operations.

The new seed fund for startups comes after the Ministry of Electronics and Information Technology had earlier last year initiated a similar fund to identify startups and give them financial help. In August, the ministry had launched a fund to identify 300 startups which would be provided seed fund of up to Rs 25 lakh and other facilities as well. A budget of Rs 95.03 crore has been earmarked for the programme named 'Chunauti', to be spent over a period of three years. The IT Ministry's programme seeks to award startups in the fields of edu-tech, agri-tech, supply chain, logistics, and transport management, as well as medical healthcare, diagnostics, preventive and psychological care among other areas.

Apart from these seed funds, the ministry has over the last year also conducted several other competitions to award startups working in several areas, such as video-conferencing, artificial intelligence among others. Last July, the ministry had launched a challenge inviting Indian developers to come up with apps in a range of segments such as office productivity, social networking, e-learning and news, games, health and wellness, agri-tech, fin-tech and entertainment, and speech translation, among others.

A different challenge launched in April last year, which sought a world class video-conference solution, which could be an alternative to global apps such as Zoom, saw Kerala-based Techgentsia Software Technologies win a prize money of Rs 1 crore.

"Earlier on hearing about the startup people used to ask 'why you don't do a job?'. But now people why not create a startup insisted of doing a job".

Ritika Chaudhary, BBA Vth Sem.

Check and Mate

Life is like a game of chess,

When you think it's a mess

With every move you make

You create a story for the rest,

For everyone is the part of your story

And your dots link to them,

Even when you have played your game

It's not the end, there is another story

At another end, waiting for your move

Check & mate has never been the end.
