Detailed Programme Schedule

Topics

Days

Introduction to Modern App Development

Importance of App Modernization, Important Modernization Technologies

Introduction Red Hat

Products of Red Hat and Architecture, Red Hat's approach to application modernization?

Developer Sandbox for Red Hat OpenShift

Get started in the Sandbox, Introduction to OpenShift Dedicated & Architecture concepts

Working with features of RedHat Dedicated & Understanding the features like

observe, ConfigMaps, Secrets and search

Red Hat CodeReady Workspaces

Learn launching the workspaces, Working on In-browser IDE and create the projects, Edit & test the app code in workspace

Day-1

Hands-on with Web-app Development

HTML Basics, HTML with CSS, JavaScript

Introduction to Flask

Python and Flask Environment Setup, Flask Basics and Routes, Dynamic

Routing, Forms, HTTP Methods, Templates and Static Files, Redirect and Errors,

Cookies and Session

Day-2

IBM Object Storage

Introduction to IBM Object Storage & Introducing python SDK for IBM Object Storage, Creating a new bucket, Uploading files to the bucket & Update and delete the files in bucket, Connecting Flask application with Cloud Object Storage

IBM Watson Assistant

An Introduction to Watson Assistant & Learning about Intents, Entities, Dialog

Building a use case with IBM Watson Assistant

Learn integrating Bot with Flask App

Day-3

IBM DB2

Introduction to IBM DB2 Database, Introducing python SDK for IBM DB2

Database, Connecting Flask app to DB2 Database, Working on Insert, Update,

Delete, Retrieve, Learn creating micro-services with CRUD operations

Containerize your application

Intro and Basics of Containerization, What is a Container?

Containerization vs. Virtual Machine, Docker Installation

Main Docker Commands, Building your own Containerized Image for Flask

Application

Day-4

Kubernetes

Introduction to Kubernetes, Understand the main Kubernetes Components

Kubernetes Architecture, Learn Kubernetes YAML Configuration File

Learn to deploy with application with configuration file

Deploy the application

Deploy the application using 3 different techniques in OpenShift

- Using a container image, - Using a Git repo, - Import from local YAML file

Mini Project

Day-5
