

Use of Tech-Savvy Tools for Learning Languages

Date: 20 October 2023

The Department of English, Kanya Gurukul Campus, organized a hybrid guest lecture on 20 October 2023 on the topic "Use of Tech-Savvy Tools for Learning Languages." Dr. Reena Verma introduced and welcomed the guest speaker, Dr. Lakshmi R. Chauhan.

Dr. Lakshmi R. Chauhan spoke about various online and offline applications that can be used for language learning. She highlighted the multiple benefits of these applications and explained how they help learners concentrate on specific aspects of language acquisition while enabling them to develop useful skills and become the best version of themselves.

She emphasized that self-learning has become a significant trend in recent decades, and learning English through mobile applications combines the power of technology with the learner's desire for independent study. In today's world, one simply needs to download language-learning applications on a smartphone to begin learning English.

She further explained that these applications offer several advantages. Firstly, learners can study different languages anytime, day or night, at their own convenience. Secondly, modern language-learning applications are specifically designed to make language learning faster and more effective. They allow learners to read lessons, listen to authentic foreign speech, and build English vocabulary efficiently.

Dr. Chauhan also stressed the growing role of Artificial Intelligence (AI) in assisting language learners. She explained how AI-powered tools are making language learning more personalized, interactive, and effective. The lecture was highly informative and is expected to help students master various technological tools and applications for improving their language proficiency.

The vote of thanks was delivered by Prof. Hemlatha K. The Campus Coordinator, Prof. Renu Shukla, was also present during the lecture. In addition, all senior faculty members, Ph.D. scholars, and more than 150 students attended the event.
